

## Survival

Many General Aviation (GA) accidents are survivable if you are equipped with the right equipment and can use the right techniques. For example in Alaska, especially regarding the use of four or five point seatbelts, or adding helmets could save 60 percent of the lives involved in an aircraft accident. Are you prepared and do you have the tools you need to survive an accident?

**Directions:** Wing Classroom (follow signs)

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

### Event Details

**Tue, Oct 27, 2015 - 19:00 CDT**

**CAP Headquarters & 42nd**

**Composite Squadron**

2201 Crisp Drive

Little Rock, AR 72202

**Contact: Heather Metzler**

**501-918-4400**
